NOLWENN CONAN

SLOT 1: GAPS IN THE CASCADE OF CARE IN TWO HIGH HIV PREVALENCE SETTINGS IN ZIMBABWE AND MALAWI

BOTH ZIMBABWE AND MALAWI ARE NEARING THE 90-90-90 TARGET

WE SURVEYED TWO AREAS

IN NSANJE THE RESULTS WERE SIMILAR

WE HAD GOOD COVERAGE ACROSS THE AREA!

GUTU HAD HIGHER RESULTS THAN NATIONAL LEVEL

NSANJE DISTRICT ... BUT NO SIGNIFICANT DIFFERENCE WAS FOUND IN MALAWI

...AND IS CLOSE TO THE 90-90-90 TARGET

THE SURVEY FOCUSED ON ADULTS...
...SO WE SHOULD RESEARCH CHILDREN AS WELL.
